SUBJ	ECTIVE QUESTION AND ANSWER OF	20M
1MA	RKS AND 2MARKS	
Name:	DELHI PUBLIC SCHOOL, BAHADI Summative Assessment - Sample VII Subject: Computer Time: 3 hrs. Section: Ctions:	
	 Attempt all the questions. Marks are indicated against each question. Attempt the paper neatly and sketch the line after complete. 	ing each part.
Q1: Fi	ll in the blanks [1*10=10]	
1.	The base of Octal number system is	
2.	Hexadecimal number system consists of digits.	
3.	With numeric keypad in mouse mode, thekey is used fo	r diagonally left-upward
	movement.	
4.	Windows has simplified the task of in computer	S.
5.	A database is a collection of information.	
6.	To search a record with specific value, click on the	·
7.	are input to the functions, which accept values as nu	
8.	A formula always begins with a sign and is used to per	rform

the normal operation of a Computer. Q2. True / False	9).	We can insert pictures in a wor	rksheet usingop	tion.	
[1*10=10]	1	0.	Virus the normal operation of a Computer.			
[1*10=10]	Ω2. 1	Γrı	ue / False			
1. A chart is updated automatically with the change in data. 2. The sticky key feature automatically deactivates itself if two keys are pressed together. 3. X-axis is the horizontal axis. 4. The numbers used in octal number system are 1 to 7. 5. Ada Lovelace introduced the concept of zero. 6. AVERAGE function is used to find sum of values. 7. In relative referencing, '\$' sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language.	~2.					
2. The sticky key feature automatically deactivates itself if two keys are pressed together. 3. X-axis is the horizontal axis. 4. The numbers used in octal number system are 1 to 7. 5. Ada Lovelace introduced the concept of zero. 6. AVERAGE function is used to find sum of values. 7. In relative referencing, '\$' sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet	1					
3. X-axis is the horizontal axis. 4. The numbers used in octal number system are 1 to 7. 5. Ada Lovelace introduced the concept of zero. 6. AVERAGE function is used to find sum of values. 7. In relative referencing, "\$" sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet!!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet			_	_		
4. The numbers used in octal number system are 1 to 7. 5. Ada Lovelace introduced the concept of zero. 6. AVERAGE function is used to find sum of values. 7. In relative referencing, '\$' sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. 7. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet			• •	tically deactivates itself if	two keys are pressed together.	
5. Ada Lovelace introduced the concept of zero. 6. AVERAGE function is used to find sum of values. 7. In relative referencing, '\$' sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet				ah an avatam ana 1 ta 7		
6. AVERAGE function is used to find sum of values. 7. In relative referencing, '\$' sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet				-		
7. In relative referencing, '\$' sign is used before the cell co-ordinates. 8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. 1*10=10 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet				•		
8. Sheet tab cannot be renamed. 9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English					o-ordinates	
9. All the worksheets cannot be deleted in a workbook. 10. Form provides the option to delete a particular record. Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet			<u> </u>	i is used before the cen e	o-ordinates.	
Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet				leleted in a workhook		
Q3. Multiple Choice Questions. [1*10=10] 1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet						
1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet	-		Toma provides and option to de	purcount records		
1. Computer understands only language. a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet	O3. I	Mu	ultiple Choice Questions.			
a. English b. French c. Binary 2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet			-			
2. To perform division on Binary number, divide the number by a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet	1		Computer understands only	language.		
a. 4 b. 2 c. 8 1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. Windows explorer c. My documents 5. Which key is used to group multiple worksheets? a. Shift b. Ctrl c. Enter 6. Which function returns the remainder after a number is divided by the divisor? a. MOD b. POWER c. SUM 7. To use the sheet reference, we have to specify the address in which of the following way. a. D1!sheet1 b. Sheet1,D1 c. Sheet1!D1 8. Name the special window that displays data, when you insert a chart. a. Datasheet b. Database c. Sheet			a. English	b. French	c. Binary	
1 3 uses 16 symbols to represent numbers. a. Hexadecimal b. Decimal c. Octal 4 is a system folder using which appearances and current setting of windows can be changed. a. Control Panel b. a. Datasheet b. Database c. Sheet	0)				
	8).	-			
	0					
9. Which option is used to restrict the cell entries within the specified range?a. Advanced Filterb. Data validationc. Pivot Table	9	' .	_			

- 10. Which button under Data tab is used to remove a duplicate value from a column?
 - a. Remove data
- b. Remove

c. Remove duplicates

Q4. Application Based Questions.

[1*5=5]

- 1. Ratika's computer teacher has given an assignment to sourav on Binary subtraction. Sourav is confused how to subtract 1 from 0. Help him in solving the problem.
- 2. Meenakshi has stored various files in her laptop. She wants to view all the files with detailed information including name, type, size and date modified. Suggest her the view format which would fulfill her requirement.
- **3.** Ritu has to complete her assignment and submit it on next day. While typing, all of a sudden, the keyboard of the system stopped working. Suggest her the alternative to complete the assignment.
- **4.** Tripti has created a chart. She wants to improve the appearance of her chart by changing the background colour its plot area. Which option will you suggest her to perform this task.
- 5. Varsha's computer has got infected with a virus which lead to the frequent hanging of the system. Which software will you suggest her to install in order to solve.

Q5. Short cut for the following:

[1*5=5]

- 1. To Cut
- 2. To Paste
- 3. To Save
- 4. To Undo
- 5. To Redo

2

Q6. Differentiate between

[2*5=10]

- 1. Windows 7 and Windows 8
- 2. Relative and Mixed reference
- 3. Workbook and Worksheet
- 4. Trojan Horse and Worm
- 5. Computer Virus and Biological Virus

Q7. Some Students are planning a school Promotional event. Read the table and anwer

	A	В	С	D	Е
1					
2	Number of students paying			150	
3					
4	Expenditure	Cost of each	Number Needed	Total Cost	
5	coach hire	5000	4	20000	
6	Function Rooms	700	3	2100	
7	Decorations (per room)	1250	3	3750	
8	Three Course Meal	500	150	75000	
9	soft drinks	50	150	7500	
10					
11					
12	Total Cost			108350	
13					
14	cost per student			722.33	
15					
16					
17					

Q1-Q5 [1*5=5]

Q1. What is the cell reference of the shaded cell?

- Q2. Name the data/value types that have been used in this spreadsheet.
- Q3. What formula has been used to calculate the cost per student in D14
- Q4. All students will pay Rs. 500. How much money will be raised by the collection? You have to write this in D16, write the formula.
- Q5. Write the formula for how much extra money is needed to store in D17.

Q8. Define

[1*5=5]

- 1. Hexadecimal number system
- 2. Control Panel
- 3. Formulas
- 4. Field Name
- 5. Virus

Q9. Answer the following

[20]

1. Which option is used to change Date and Time settings?

[1]

	[1]
	3
3.	What do you mean by conditional formatting?
	[1]
4.	Explain Consolidating Data.
	[1]
5.	What is Chart?
	[1]
6.	What is Antivirus?
	[1]
7.	Which Virus was first detected on ARPANET in the early 1970's
	[1]
8.	Name four popular viruses.
	[1]
9.	Name and explain four different view formats.
10	
10.	Explain how we use Ranges in formulas.
	[2]
11.	Write steps to add a new Record in a form
12	[2]
12.	Write and explain all four chart types.
13	[2] Name two types of Viruses and explain them.
13.	[2]
14	State any four Virus symptoms.
	[2]
Q11. D	o as Directed [2*5=10]
1.	Convert following Decimals into binary
1.	(a) 108 (b) 94
2.	Convert following binary into decimals
2.	(a) 11100011 (b) 101011011
3.	Add
- •	(a) 10101 + 00111 (b) 101010001 + 0101011
4.	Subtract

2. What do you mean by functions in Excel?

(a) 110111-101110 (b) 11001001 - 01100110

5. Multiply

(a) 111011011 X 1011 (b) 10001001 X 100101

Q6. D i	ifferentia	te between		[10]
1.	Windov	vs 7 and Windows 8		
	Srl	Windows 7	Windows 8	}
	No.			
	1	Released on October 2000	Released on 26 October 20	12a

17. True

2.	Memory is 2 GB to 192 GB	Memory is 4 GB to 2048 GB
3.	It has touch and handwriting features	It is faster startup
4.	Its start screen has Icons	Its start screen has tiles

2. Relative and Mixed reference

Relative Reference – References to a cell or ranges are usually based on the position relative to the cell. When we copy or move the formula to other cells, the reference cell automatically gets changed. E.g., if the formula in A3 is = A1 + A2 and when we copy the formula from A3 to B3, Excel automatically changes the reference to match the location of cells i.e. = B1 + B2.

2

Mixed Reference – It is a combination of Relative and Absolute reference. In this type of reference, either row or column has to remain fixed. \$A1 + A\$2 is an example of Mixed reference.

3. Workbook and Worksheet

The main difference between Excel Workbook and Worksheet is that Excel Workbook comprises number of worksheets while worksheet means a single sheet in Excel workbook. It is like a complete book and single page. Excel Workbook is the complete book and Excel Worksheet is like a single page in a book.

4. Trojan Horse and Worm

Worm - A worm is similar to a virus by design and is considered to be a sub-class of a virus. Worms spread from computer to computer, but unlike a virus, it has the capability to travel without any human action. A worm takes advantage of file or information transport features on your system, which is what allows it to travel unaided.

Trojan Horse - A Trojan Horse is full of as much trickery as the mythological Trojan Horse it was named after. The Trojan Horse, at first glance will appear to be useful <u>software</u> but will actually do damage once installed or run on your computer. Those on the receiving end of a Trojan Horse are usually tricked into opening them because they appear to be receiving legitimate software or files from a legitimate source.

5. Computer Virus and Biological Virus

Biological Virus - They are living, thus infects living things. Biological Viruses can infect all form of life including Human, Animals, Plants, Insects, Bacteria, Protozoa, Fungi, Archae and other viruses

Computer Virus - They are programmed, thus made impact on programs (softwares) Computer viruses infect mostly PCs, Servers, websites and software. Computer viruses mostly targets PCs with MS windows Operating system and rarely other Operating System.

Q7. Excel Table

[5]

- 1. B5
- 2. Number, text and formula
- 3. D12/150
- 4. D2*500
- 5. D12-D16

Q8. Define

[5]

6. **Hexadecimal number system** – This number system contains 16 symbols and, therefore, has the base 16. It uses the digits (0-9) and (A-F).

3

- 7. **Control Panel** Control Panel is a system folder using which we can make changes in the appearance and current settings of Windows. These include:
 - ➤ Appearance and Personalization of the desktop.
 - ➤ Hardware and Software Setup and Configuration
 - System and Security
 - Networking and Internet
 - ➤ User Accounts and Family Safety
 - Setting Clock, Language and Region

These settings control nearly everything regarding Windows looks and works.

8. Formulas - Formulas are used to perform calculations involving addition, subtraction, division and multiplication. It establishes a relationship between two or more cells. A formula is an expression that can include cell addresses, numbers, arithmetic operators and parenthesis.

Examples: Let us calculate the sum of the numbers in B4, B5,..... B9 and display the result in B11.

Follow the steps:

- Click on cell B11 where you want to display the total. Type = sign
- ➤ Click on cell B4. Its address will appear in cell B11. Type + sign after that.
- Further, repeat the steps till b9 or type =B4+B5+B6+B7+B8+B9 in B11
- > Press the enter key. Cell B11 will display the total of all the values from B4 to B9.

- 9. **Field Name** It is a column label for the field in a database. All the field names appear in one row. For Example Row No., Name, English, Hindi, Maths, Total, Per(%) are the Field Names.
- 10. Virus— The full form of VIRUS is Vital Information Resources under Seize. A computer virus is a program or a set of programs that disrupts the normal operation of a computer. Virus infects or destroys data. It enters in the computer without the permission or knowledge of the user. The essential resources of the computer like memory, processing speed, data and programs etc. cannot have normal operations and can be harmed, when virus is spread.

Q9. Answer the following

[20]

- 15. Control Panel
- 16. Functions are pre-designed formulas in Excel to perform simple and complex calculations.
- 17. Conditional Formatting (CF) is a tool that allows you to apply formats to a cell or range of cells, and have that formatting change depending on the value of the cell or the value of a formula.
- 18. Consolidating Data refers to combining of data. We can combine data of various ranges either in the same or different worksheet.
 - To consolidate data, use the Consolidate command in the Data Tools group on the Data tab.
- 19. Chart is an effective way to display data in a pictorial form. Charts make it easier to draw comparison and analysis the growth, relationship and trends among the values in a range. Charts provide more accurate analysis of information.

4

- 20. Antivirus Software are computer programs which are designed to identify, prevent and remove viruses from a computer.
- 21. Creeper Virus
- 22. Jerusalem, Brain, April first, Ping Pong.
- 23. Extra large icons, Large icons, Medium icons, small icons, list, details, tiles, content. (explain any four)
- 24. Ranges in formulas We can assign multiple cells to a formula by creating a reference or a range. Ranges save a lot of time. If we want to calculate the sum of columns or rows, it is always better to define a range.
- 25. New Record in a form Using the data form, we can add a new record. The following steps are for entering a new records:
 - ➤ Click on a cell. Then, click on Form button on the Quick Access toolbar. The Sheet1 dialog box appears, it contains the record of the database.
 - To add a new record, click on New button.

- > Type the information for the new record in appropriate text boxes.
- Click on Close button to close the data form.
- The new record will be visible in the database.

26. Four chart types are Column, Bar, Line & Pie.

Column – A column chart is a commonly used chart type to display data in the form of vertical bars. It is used to show changes in data over a period of time or comparisons among different data items. In a column chart, categories are organized along the horizontal axis and values along the vertical axis.

Bar – The cart displays data in the form of long rectangular rods also called Bars that are placed vertically or horizontally on the Chart area. A Bar chart illustrates comparisons among individual items. In this type of chart, categories are represented on the vertical axis and values are represented on the horizontal axis.

Line – This chart is in the form of lines. It is very similar to plotting a graph on a graph paper with its values on the X and Y-axis. A line chart uses connecting dots to display trends in data over a period of time.

Pie – This chart displays data in the form of a circle that makes up a data series to the sum of items. It always shows only one data series and is useful when you want to emphasize on a significant element.

27. Two types of Viruses are Boot Viruses and Program File Viruses.

Boot Viruses – These viruses infect the boot record or master boot records. They replace the boot record that is responsible for loading the Operating System in memory by copying it elsewhere. Boot virus becomes active at the time of booting the machine. Examples are – Disk Killer, Stoned virus etc.

5

Program File Viruses – These viruses infect executable files, programs such as those with extension like .com, .exe, .ovl, .drv, .sys etc. these programs get loaded in the memory during execution. The virus becomes active in memory by replicating itself and infecting files on the disk. The examples of Program file virus are Sunday, Cascade etc.

28. Four Virus symptoms are:

- i. Decreasing the speed of a computer by decreasing the memory.
- ii. Frequent hanging of the system.
- iii. Displaying a change in data against the filename in the directory, when a virus modifies the file,
- iv. Deleting or damaging files.

Q11. Do as Directed

6.	Convert following Decimals into binary				
		(b) 1101100	(b) 1011110		
7.	Convert follo	owing binary into decimals			
		1. 227	(b) 347		
8.	Add				
		(b) 11100	(b) 101111100		
9.	Subtract				
		(b) 1001	(b) 1100011		
10	. Multiply				
		(b) 1010001101001	(b) 1001111001101
